

GitLab

Git and Github

1. create an account on Github
2. Our agenda is to store the Terraform Infra code in a folder (Repository) on Github
3. create a repository on Github (if not exist)
4. clone that repo in local system
(git clone <repository_name>)

Git Commands that you need to learn

1. *git --help*
2. *git clone*
3. *git init*
4. *git add*
5. *git log*
6. *git status*
7. *git branch*
8. *git commit*
9. *git merge*
10. *git rebase*
11. *git reset*
12. *git switch*
13. *git fetch*
14. *git pull*
15. *git push*

Folders and Files git status

1. newly added files - Untracked (U)
Untracked ko git pehchanta nahi hai
2. Untracked to Tracked
git add karke tracked banate hai
3. Tracked means Added (A)
